EDUCATION

University of Washington, *Seattle, WA* | Major – Informatics | Expected Graduation 2026

CODING PROJECTS and HACKATHONS

- ♦ [Changeability](#) – Designed a sustainability app for INFO 200. This app assists users in becoming more sustainable and eco-conscious.
 - ♦ [Eat Together Designs](#) – Collection of designs I developed for a student-created startup, Eat Together.
 - ♦ [Bioinformatics Research](#) – GitHub contains Bash scripts used to segment, download, and filter genomes.
 - ♦ [Truck Calculator](#) – Created an input calculator using Java for my father's trucking business, to calculate brokerage and fuel charge.
 - ♦ [MLH Tech Together Hackathon](#)
 - Created a prototype website that would benefit our local mosque in taking attendance and assigning homework. (WON).
 - ♦ [Chique Website Design Figma](#) – Designed a clothing website using competitive analysis and AI images such as clothing and accessories.
-

WORK - EXPERIENCE

Microsoft | Incoming Software Engineering Intern

Redmond, WA | Jun 2025 – Sep 2025

- ♦ Built and deployed a natural language to KQL agent with Azure AI, C#, and React, enabling PMs and developers to retrieve telemetry data in seconds.
- ♦ Cut query generation and telemetry search time by 93% (30–45 min to 2 min) while supporting 500+ daily active users.
- ♦ Designed a scalable multi-agent system (Profiler + Query) with reporting and graph rendering capabilities, now being onboarded across multiple teams.
- ♦ Enhanced and expanded a prior AI assistant project, integrating new functionality into engineering workflows.

Microsoft | Explore Intern (SWE+ PM)

Redmond, WA | Jun 2024 – Sep 2024

- ♦ Coded in the Lit framework to redesign the frontend of an Artificial Intelligent financial assistant.
- ♦ Used existing projects AI backend while implementing new API requests.
- ♦ Reduced bundle size by 80% (2.6 mb to 400 kb) and sped up response and runtime by 2x.
- ♦ Over achieved a Minimal viable product by completing requirements and implementing new creative features.

Eat together | UX/UI Designer & Researcher

Seattle, WA | November 2023 – June 2025

- ♦ Student led startup focused on creating relationships and community through food.
- ♦ Conducted 4 user studies to improve usage of the app and understand users interactions.
- ♦ Refining the app by fixing bugs, enhancing functionality, and improving the design for a more attractive appearance.

University of Washington| Data Research Intern

Seattle, WA | June 2023 – June 2025

- ♦ Coded a Bash script and used Unix/Terminal. Applied this to discover genes and create primers.
- ♦ Used Geneious prime to identify genes and endophytes locations.
- ♦ Using R and Microsoft products to create searchable tables/web apps and to assist the previously mentioned tasks.
- ♦ Published a protocol and searchable strain specific primer data table using R quarto.

Microsoft| Highschool Discovery Intern

Redmond, WA | July 2022 – August 2022

- ♦ Learned to code in Python and created projects with fellow interns.
 - ♦ Created Designs for Microsoft 365 as a solution to a proposed problem.
 - ♦ Used Figma, Python, GitHub and Microsoft products to assist the previously mentioned problem.
-

ORGANIZATION - AFFILIATIONS

♦ ECHO, Exploring Careers Helping Others

Feb 2024 – Present

- Mentoring 70 undergrad students and high schoolers in finding internships, resume reviews, academic help, etc.
- Assisted 4 students in securing internships at fortune 500 companies, yielding 100% success rate.

♦ Vice President of Programming, ColorStack

April 2024 – June 2025

♦ Web Impact (UW Club)

October 2023 – June 2025

COURSES

- ♦ University of Washington – Computer Science 121, 122, 123, Math 124, 125, 126, INFO 200, 201, 340, Design 166, GEOG 360.
-

SKILLS

- ♦ Programming Languages/Tools| Java - Beginner, HTML/CSS – Beginner, Bash – Beginner, Unix –Beginner, R- Beginner, Figma.
